Cold Drink and Portion Cups

PLA (Polylactic Acid)

Cold Cups & Lids

These guidelines are supplied to assist you in determining the proper use of Pactiv products. They are based upon testing and published guidelines and are reliable in most applications. However, because every food supplier's recipes, ingredients, processes and supply chain is unique, these guidelines are not a substitute for product testing. Confirmation of product acceptability under your specific conditions of use must be done by you.

*PCR stands for post-consumer recycled material, which is material reclaimed and recovered after consumer use.

FEATURES

Exceptional clarity and strength

Optimized cube utilization packs

Convenience

Snap lock lids

Stackable portion cups

PLA (Polylactic Acid)

BENEFITS

Makes contents easy to identify

Efficient case packs for shipping

Cups can be filled in advance

Ensures a secure fitting lid

Saves space

PLA is a natural plastic material called Ingeo™ which is made from plants instead of oil and is 100% annually renewable. Because PLA is a natural material, it is best used for cold applications and has a heat tolerance of 105 °F*

*Fully compostable in municipal & industrial compost facilities where available

ASTM D 6400 certified and compostable in commercial facilities only, which may not exist in all areas. Not suitable for backyard composting.

Reduce

We strive to minimize packaging, petroleum based materials and energy use across the supply chain.

Reuse

We are committed to using post-consumer recycled materials, where available to produce new products.

Recycle

We are actively engaged in projects to increase the recycling of all foodservice packaging into new manufactured products.

Renew

We utilize renewable and compostable resources.

*PCR stands for post-consumer recycled material, which is material reclaimed and recovered after consumer use.
