

Cutlery

PSM (Plastarch Material) & RPP (Recycled Polypropylene)

EarthChoice PSM Cutlery

EarthChoice PSM Cutlery is manufactured from a blend of different materials, the majority of which is starch. 20% of the base material comes from corn not originally intended for human consumption (not genetically modified). This material can handle temperatures up to 200F which makes it perfect for higher heat applications.

EarthChoice Recycled Polypropylene Cutlery

EarthChoice Recycled Polypropylene Cutlery is made from a minimum of 20% previously used post-consumer plastic products. Products made from post-consumer materials mean less plastic in landfills. This unbreakable lineup performs with the same strength as traditional polypropylene cutlery and can be used for both hot and cold foods.

These guidelines are supplied to assist you in determining the proper use of Pactiv products. They are based upon testing and published guidelines and are reliable in most applications. However, because every food supplier's recipes, ingredients, processes and supply chain is unique, these guidelines are not a substitute for product testing. Confirmation of product acceptability under your specific conditions of use must be done by you.

Reduce We strive to minimize packaging, petroleum based materials and energy use across the supply chain.

Reuse We are committed to using post-consumer recycled materials, where available to produce new products.

Recycle We are actively engaged in projects to increase the recycling of all foodservice packaging into new manufactured products.

Renew We utilize renewable and compostable resources.
